*It is an alarming fact that over 1,000,000 children are reported missing in the United States each year. While most are found, many are not.*

The Massachusetts Masonic Youth Child Identification Program (MYCHIP) provides children's families with identification materials designed to help find a missing child as quickly as possible. It is the most comprehensive service of its kind *in the world* and is hailed by recovery officials at the National Center for Missing and Exploited Children.

## **The MYCHIP identification materials include:**

- VIDEO:** A brief video interview that can be quickly distributed to the media.
- FINGERPRINTS:** Fingerprinting is a well-known means of identification. Resourceful parents keep fingerprints available should the need arise.
- TOOTHPRINTS:** A Toothprint™ bite impression is quick and easy. Teeth, like fingerprints are unique. Dental imprints give accurate and important information for identification purposes.
- DNA SWABS:** Nearly 100% accurate for identification – done in seconds!
